

*National Doctors' Day is March 30*  
**Thank You for All You Do for Our Members**  
**Especially During the COVID-19 Pandemic**

Dear Florida Blue Physicians:

How timely to be celebrating National Doctors' Day now when you and other health care professionals are on the front line of the worldwide coronavirus disease (COVID-19) public health crisis.

It seems almost trivial to extend our thanks at a time like this, but honestly, it's more appropriate than ever. Thank you! On this special day – particularly in these unusual times – we want to thank you for the care you provide our Florida Blue members.

We extend our sincere appreciation for all you do to provide affordable, high-quality care to our members, not just on this day, but every day.

You have the most important role in caring for your patients, and we know it's not without its challenges. Through it all, you continue to be dedicated to helping our members get well and stay well.

As we all adjust our lives during this ever-changing time period, we recognize you and everything you do to provide the best possible patient care. Thank you for being a part of Florida Blue.

Sincerely,

Elana Schrader, M.D.  
Senior Vice President, Health Care Services
