

June 2018

Outpatient Authorization Enhancement for *Place of Service 12 - Home*

We're enhancing the Outpatient Authorization screen on Availity^{®1} for submitting a request for services performed at a member's home as the place of service.

Place of Service 12 - HOME - Outpatient Authorization

Starting June 18, 2018, when you select **12 - Home** as the place of service for an outpatient authorization, the **Location – Where Services are Rendered** section will no longer be required and will no longer be displayed.

The **Requesting Provider** and **Provider-Performing the Services** sections will be the only provider information required for the outpatient authorization request when **12 - Home** is selected as the place of service. With fewer sections to complete, the process is faster and easier.

For details about our referral and authorization requirements, please refer the [Manual for Physicians and Providers](#) on our website at floridablue.com; select Providers > Tools & Resources > Provider Manual.

¹Availity, LLC is a multi-payer joint venture company. For more information or to register, visit Availity's website at availity.com.
