

## **CPT® II Codes for Showing Patients' Care is Complete** **(for A1c, BP, Care for Older Adults, DRE, Microalbuminuria and MRP)**

### **CPT II Code Definitions**

- Current Procedural Terminology Category II (CPT II) codes usually describe a clinical component that is part of the Evaluation and Management service, results from a test, and other procedures identified as measurable data for quality of care. These codes do not have a fee schedule attached.
- CPT II Codes do not replace CPT codes. You still need to include the appropriate codes for the services provided during the visit. CPT II codes are billed in the procedure code field, just as CPT I codes are reported.
- Using CPT II codes allows us to track performance measures throughout the year. The codes help identify opportunities for improvement and implement interventions in a timelier manner to improve performance and provide positive outcomes for members.

### **Benefits of Submitting CPT II Codes**

CPT II codes are used to:

- Report performance measures and provide clinical data to us that helps you manage your Florida Blue and Florida Blue Medicare patients.
- Assist you in identifying patients in your panel who may need increased clinical oversight or adjustment in their treatment plans to achieve their desired health status.
- Identify procedures or clinical activities performed in your office such as review of retinal eye screening reports and medication reconciliation activities performed post-discharge.
- Close gaps in care and can also reduce the burden of chart requests during the Healthcare Effectiveness Data and Information Set (HEDIS®<sup>1</sup>) chart chase season since these services are captured through the claim process.

### **HEDIS Stars Measures Reference Guide**

For a complete list of CPT II codes that can be used relative to the Stars measures, see our [Stars Measures Reference Guide](#) at [floridablue.com](http://floridablue.com), select Tools & Resources, Medicare Stars and then HEDIS Stars Measures & Reference Materials.

### **2020 HEDIS Documentation & Coding Guide**

For a complete list of CPT II codes that can be used relative to the Commercial measures, see our [Documentation and Coding Guides](#) at [floridablue.com](http://floridablue.com), select Tools & Resources and then HEDIS Measures & Reference Materials.

## CPT II Codes for Closing Certain Care Gaps

The table below lists CPT II codes that can be used to show diabetes care, blood pressure, medication reconciliation, functional assessment and pain assessment are evaluated.

<b>Hemoglobin A1c</b>		
3044F	CPT II	Most recent hemoglobin A1c level less than 7.0%
3046F	CPT II	Most recent hemoglobin A1c level greater than 9.0%
3051F	CPT II	Most recent hemoglobin A1c level greater than or equal to 7.0% and less than 8.0%
3052F	CPT II	Most recent hemoglobin A1c level greater than or equal to 8.0% and less than or equal to 9.0%
<b>Dilated or Retinal Eye Exam</b>		
2022F	CPT II	Dilated retinal eye exam with interpretation by an ophthalmologist or optometrist documented and reviewed; with evidence of retinopathy
2023F	CPT II	Dilated retinal eye exam with interpretation by an ophthalmologist or optometrist documented and reviewed; without evidence of retinopathy
2024F	CPT II	Seven standard field stereoscopic retinal photos with interpretation by an ophthalmologist or optometrist documented and reviewed; with evidence of retinopathy
2025F	CPT II	Seven standard field stereoscopic retinal photos with interpretation by an ophthalmologist or optometrist documented and reviewed; without evidence of retinopathy
2026F	CPT II	Eye imaging validated to match diagnosis from seven standard field stereoscopic retinal photos results documented and reviewed; with evidence of retinopathy
2033F	CPT II	Eye imaging validated to match diagnosis from seven standard field stereoscopic retinal photos results documented and reviewed; without evidence of retinopathy
3072F	CPT II	Low risk for retinopathy (no evidence of retinopathy in the prior year)
<b>Microalbumin</b>		
3060F	CPT II	Screening test - positive <b>microalbuminuria</b> test result documented and reviewed (diabetes mellitus)
3061F	CPT II	Screening test - negative <b>microalbuminuria</b> test result documented and reviewed (diabetes mellitus)
3062F	CPT II	Positive <b>macroalbuminuria</b> test result documented and reviewed (diabetes mellitus)
<b>Treatment for Nephropathy</b>		
3066F	CPT II	Documentation of treatment for nephropathy (patient receiving dialysis, patient being treated for ESRD, CRF, ARF, or renal insufficiency, any visit to a nephrologist).
4010F	CPT II	Evidence of ACE/ARB therapy
<b>Blood Pressure</b>		
3074F	CPT II	Most recent systolic blood pressure less than 130 mm Hg
3075F	CPT II	Most recent systolic blood pressure 130 – 139 mm Hg
3077F	CPT II	Most recent systolic blood pressure greater than or equal to 140 mm Hg
3078F	CPT II	Most recent diastolic pressure less than 80 mm Hg
3079F	CPT II	Most recent diastolic pressure 80 - 89 mm Hg
3080F	CPT II	Most recent diastolic pressure greater than or equal to 90 mm Hg
<b>Medication Reconciliation Post-Discharge</b>		
1111F	CPT II	Discharge medications reconciled with current medication list in outpatient medical record
<b>Care for Older Adults</b>		
1159F	CPT II	Medication list documented in the medical record
1160F	CPT II	Review of all medications by a prescribing practitioner or clinical pharmacist documented in the medical record
1170F	CPT II	Functional status assessed
1125F	CPT II	Pain severity quantified; pain present
1126F	CPT II	Pain severity quantified; No pain present
