October 2018

Get Your 2018 Coding CEUs Now!

The new year is fast approaching so time is limited to get your 2018 continuing education units (CEUs). Sign up now for a coding webinar to get your CEUs before the end of the year! On-demand coding webinars are available without advance registration.

Registration for our live webinars is simple and fast. You'll also find that our on-demand webinars are a quick and easy way to obtain the information at a time that is convenient for you. All courses can be found in the Availity¹ Learning Center at availability.com. You can also create your own account at floridablue.learnupon.com/catalog.

Our educators have created live and on-demand coding webinars that go into detail about how to support diagnoses according to guidelines from the Centers for Medicare and Medicaid Services (CMS).

Our webinars:

- Dive into coding best practices
- Encourage the use of the MEAT method (Monitor, Evaluate, Assess/Address, Treat) as a way of being thorough in medical record documentation
- Focus on chronic conditions, such as atrial fibrillation and chronic kidney disease, that can be complex to support in medical record documentation when the payer or CMS audits for validation
- Include coding practices that will help you meet audit expectations, such as ensuring that all reported conditions applicable to the member/patient are captured
- Are available at no cost to you
- **Provide 1.5 CEU credits for coding webinars**

Remember, accurate coding not only keeps you CMS compliant, but also improves your ability to reach out and engage patients in disease and care management programs and in care prevention initiatives.

Earn your 2018 CEUs by taking a coding webinar before the end of the year!

¹Availity, LLC is a multi-payer joint venture company. For more information or to register, visit availability.com.
