

Electronic Medical Record Access for Quality and Risk Adjustment

Did you know that Florida Blue may be able to connect directly to your Electronic Medical Records (EMR) for Quality and Risk Adjustment medical records? With this access, you may experience:

- cost savings by not paying a copy service to procure charts on your behalf
- less administrative burden
- fewer phone call requests
- no office intrusion

For additional information, please see our [EMR Access Questions & Answers](#).

If you would like to use this convenient way to share information with Florida Blue, please fill out the form below. Within about a week of your request being received, you will receive a *Welcome Packet* that will contain our EMR User Agreement. Eligibility to participate in our EMR program is contingent upon Florida Blue receiving a signed copy of this agreement and satisfaction of other eligibility criteria.
