

Attention Coders

Earn Credits with Our Free On-Demand Webinars

We know coders can face a difficult task having to support diagnoses with the information captured in medical records. To help make it easier to satisfy ICD-10 coding requirements, we have created on-demand webinars detailing how to support diagnoses under the Center for Medicare & Medicaid Services (CMS)/U.S. Health and Human Services (HHS) guidelines. And with support from Availity^{®1} and the American Academy of Professional Coders (AAPC), these courses are eligible for 1.5 free continuing education unit (CEU) credits!

Coding Is Complex

It can be difficult to know what to look for in a medical record review in order to present the necessary facts accurately and in detail. Complex conditions like cancer and diabetes can be difficult to support with medical record documentation. We see this in payer or CMS/HHS audits to validate that all reported conditions are compatible with the progress notes and the assessment and treatment options for each.

Our webinars examine best practices and encourage the use of MEAT (monitor, evaluate, assess and/or treat) criteria for documenting medical records for that validation. You can register for one or all topics included in the webinar and take them at your convenience. Once you complete a webinar and pass the short quiz, you will earn 1.5 free CEUs.

How to Register

Find free webinars in the Availity Learning Center at [availity.com](https://www.availity.com) or create your own account at floridablue.learnupon.com/catalog.

¹Availity, LLC is a multi-payer joint venture company. For more information, visit [availity.com](https://www.availity.com).
