

New Features Added to Provider Link

The Platform for Managing the Unique Needs of Your Medicare Advantage Patients

The latest enhancements to the Provider Link platform as of February 21 include the following:

Enhancement: DSNP Filter

To make it easier for you to filter member lists by criteria not displayed in fields, new options are being added to the various filter windows in the platform. The first of these is the Dual Eligible Special Needs Plan (DSNP) filter option, which allows you to filter members with both Medicare Advantage and Medicaid coverage:

Enhancement: New Member Filter

A second new option for filtering member lists is the New Member filter, which allows you to filter on new members when on a page (such as Care Gaps or Coding Opportunities) other than the New Members page (which was designed to give providers a summary view of their new patients).
