Important: Patients Needing Breast
and/or Cervical Cancer Screening

Dear <Provider Name>:

Keeping up with continuously changing guidelines and recommendations for patient preventive care can be challenging. We would like to offer support by providing you with data to make it less complicated for you and your staff to deliver recommended screenings to your patients.

In the attached list, we have identified Federal Employee Program (FEP[®]) members who have not completed breast and/or cervical cancer screening in 2017 or 2018. An “X” indicates the tests patients need according to our latest records. Please use this list as a guide to see which patients have missing results and care gaps and encourage them to **complete testing before December 30, 2018**.

Annual physical exams are ideal for addressing pending screenings such as breast and cervical cancers. **Physicals are no cost to the patient and fully reimbursable to you.** Using the enclosed list will assure you have patients scheduled with immediate preventive medical needs, if you’ve not already addressed this with them.

Thank you for your dedication to the health and wellbeing of your patients, our members. For questions about this request please contact **Tamara Maeder**, RN at **904-905-5758** (Tamara.Maeder@bcbsfl.com) or **Vanessa Chatfield**, RN at **904-905-1501** (Vanessa.Chatfield@bcbsfl.com). If you have any concerns about FEP members, feel free to reach out to me directly at maria.flaquer@bcbsfl.com.

Sincerely,

Maria A. Flaquer, MD
Medical Director, Care Management
Florida Blue Federal Employee Program (FEP)

**Federal Employee Program Patients
With Breast and/or Cancer Screening Care Gaps**

Last Name	First Name	Member ID	Date of Birth	Breast Cancer	Cervical Cancer
