Children and Adolescents’ Access to Primary Care Physicians (CAP)

Let’s work together to improve health outcomes. The Healthcare Effectiveness Data and Information Set (HEDIS®) helps us measure many aspects of performance. This tip sheet details key points of the featured HEDIS measure.

**What is the measure?**
The measure focuses on patients who are:

- Age 1-6 years, who had a visit with a primary care physician (PCP) during the measurement year
- Age 7-19, who had a visit with a PCP during the measurement year or the year prior to the measurement year

---

### How to Improve Your Quality Score

- Schedule preventive care appointments for your patients and report the appropriate code to Florida Blue

**Note:** Compliance achieved with one or more reported comprehensive well-care visits with a PCP or obstetrician/gynecologist during the measurement year.

---
