

To find the category (Medicare Stars, Federal Employee Program®, etc.) this measure applies to, see our [chart of HEDIS® measures](#).

Immunizations for Adolescents (IMA)

Let's work together to improve health outcomes. The Healthcare Effectiveness Data and Information Set (HEDIS®) helps us measure many aspects of performance. This tip sheet details key points of the featured HEDIS measure.

What is the measure?

This measure assesses the percentage of 13-year-old adolescent members who have had the following by their 13th birthday:

- one dose of meningococcal vaccine
- one dose of tetanus, diphtheria toxoids and acellular pertussis (Tdap) vaccine
- three doses of human papillomavirus (HPV) vaccine

Acceptable Documents

Documentation must include the vaccination date(s) with at least one of the following:

- Certificate of immunization
- Progress note
- Diagnostic report
- Office note
- Problem list
- Subjective, Objective, Assessment **and Plan** (SOAP) note

Documentation Details

Documentation must include:

- A note indicating the name of the specific antigen and the date of the immunization.
- A certificate of immunization prepared by an authorized health care provider or agency which must include the specific dates and types of immunizations administered.
- For meningococcal conjugate, do not count meningococcal polysaccharide or serogroup B meningococcal recombinant (MenB) vaccines. General documentation that the meningococcal vaccine was administered meets criteria.
- Immunizations documented using a generic header of Tdap/Td can be counted as evidence of Tdap vaccine. The burden to substantiate the Tdap antigen is excessive compared to a risk associated with data integrity.

HEDIS Measure: Immunizations for Adolescents (continued)

Exclusions

- Member received hospice care during measurement year
- Documented anaphylactic reaction to a vaccine or its components
- Tdap-specific: Documented diagnosis of encephalopathy

Codes

Meningococcal	CPT: 90733, 90734
Tdap	CPT: 90715
Td	CPT: 90714, 90718
Tetanus	CPT: 90703
Diphtheria	CPT: 90719
HPV	CPT: 90649, 90650, 90651
Exclusions	ICD-10: T80.52XA, T80.52XD, T80.52XS
