Well-Care Visits, 3 to 6 Years of Life (W34)

Let’s work together to improve health outcomes. The Healthcare Effectiveness Data and Information Set (HEDIS®) helps us measure many aspects of performance. This tip sheet details key points of the featured HEDIS measure.

What is the measure?
The measure focuses on members age 3-6 who had at least one comprehensive well-care visit with a primary care physician (PCP) during the measurement year.

How to Improve Your Quality Score

- Code visits correctly
- At new patient visit and every future visit, schedule the next appointment
- Provide the recommended vaccine schedule, if appropriate

Note:
Compliance is reported by one or more comprehensive well-care visit with a PCP practitioner during the measurement year. The PCP does not have to be the patient’s attributed provider.
