## Helping Members Make Informed Decisions

In an effort to help members make informed decisions about their health care, Florida Blue provides a link on the online provider directory to the Florida Department of Health's website. This website provides physician and hospital information on a number of surgeries performed in a particular hospital, whether a physician has medical liability insurance and when a physician graduated from school.

To access the information, go to [floridablue.com](http://floridablue.com) > Find a Doctor (Provider Directory). Select the physician you are looking for, then click on the link next to the comment that says, "To view more information about this provider at the Florida Department of Health, please click here."
