In-Home, No-Cost Health Assessments Offered to Eligible Florida Blue Commercial Members

We're offering in-home, no-cost health assessments to your eligible Florida Blue commercial PPO and HMO patients. Our assessments are in no way intended to replace your care and expertise--they're designed to complement the care you're already providing to your patients.

What You Need to Know

We're working with PopHealthCare to have nurse practitioners conduct these health assessments for your Florida Blue patients. The assessment will include a health history and basic health measurements and lab tests.

Your Florida Blue commercial patients who qualify for these in-home health assessments will receive a letter and postcard from us. We'll also call your patients to schedule their appointment with a nurse practitioner. Additionally, we'll share your patient's assessment results with you for their medical record and so you may schedule any necessary follow-up appointments with them.

Thank you for encouraging your patients to take advantage of this convenient, no-cost care opportunity. For more information, please contact our ACA Risk Adjustment Operations Team via email at: acariskadjustment@floridablue.com.
