Documentation and Coding Tips

- Code to highest level of specificity
- Use appropriate credentials and signature
- Ensure documentation is legible
- Use only standard abbreviations
- Ensure documentation is sufficient to support and substantiate coding
- Submit chronic conditions each time they are assessed during an encounter
- Clearly show causal and linking relationships in documentation
- State diagnoses in the medical record; they cannot be inferred from physician orders, nursing notes, or lab or diagnostic test results
- Report chronic conditions (e.g., amputations, cancer) every calendar year
- Clearly document treatment and reason for level of care
- Document chronic conditions that potentially affect treatment choices
