## Improved Provider Manual to Launch in November

Florida Blue has redesigned our provider manual to make it easier to navigate and print. The improved *Manual for Physicians and Providers* launches November 15, 2019.

While the manual has no significant content changes, its PDF format allows easy search and print functionality for network, plan and product information. This will make it easier to navigate the responsibilities, rules, policies, procedures, and requirements for physicians and other providers contained in the Manual.

### How to Access the New Manual

Beginning November 15, you can access the new *Manual for Physicians and Providers* online at [floridablue.com](http://floridablue.com) >> *Providers* >> *Tools & Resources* >> *Manual for Physicians and Providers* and then click on *Physicians and Provider Manual*.

We hope you find the new manual easy to use.

For questions about the provider manual, please contact the Network Management Services Unit (NMSU) at 800-727-2227 and follow the prompts for "Contract Inquiries." You will need your NPI to contact NMSU.
