

We Are Encouraging Our Members to Tell Their Doctor If They Test Positive for COVID-19

We know the health and safety of your patients is your top priority, and during these uncertain times, we continue to support you through member outreach initiatives.

In hearing from you, we understand not all patients who test positive for COVID-19 know what to do next. To help, we are reaching out to our members to provide guidance on what to do if they test positive. This includes self-isolating at home – a key step to slowing the spread – monitoring symptoms and contacting their doctor to let them know they have tested positive.

Your patients can also call our Florida Blue Centers at 877-353-5830 for help with next steps if they test positive or need other assistance accessing community resources. Feel free to share this [informational flier](#) with your patients.

We continue to encourage our members to schedule their annual checkups, school or sports physicals and well-child immunizations either in-person or through a virtual visit. [Click here](#) to learn more.

Thank you for the care you are providing to our members. We know you are working hard to take care of your patients and keep them safe during the COVID-19 pandemic.
